The eyes have it

LINDBERG is the world's leading independent manufacturer of designer eyewear. Their eyewear is a statement about aesthetics, technical innovation and impeccable craftsmanship.

Danish design traditions produce a discreet, classic elegance and carefully considered simplicity. LINDBERG designs have won many prestigious awards, with a unique blend of no-compromise attention to detail, patented technologies and individual craftsmanship, they create a real visual impact.

Materials are responsibly sourced and exclusive materials selected for elegance, exceptional strength and distinctive look. Select materials include titanium, acetate, gold, platinum and diamonds.

Technical innovations have revolutionised modern eyewear by removing everything deemed non-essential, including all screws, rivets and welds. The resulting frames are incredibly strong, flexible and amongst the lightest and most comfortable on the market today.

Each LINDBERG frame is made to order and customised to a client's particular preferences, hand-finished and individually numbered.
